Priority: High

Dear Case Progression Team,

I write regarding **AC-2025-LON-004293 – The King (on the application of Zahmoul) v Secretary of State for Justice & Ors**, now sealed as of 1 December 2025.

1. Request for confirmation that the permission stage will not be determined on the papers

For the avoidance of doubt, I respectfully request written confirmation that the permission stage **will not be determined on the papers**, given:

- my diagnosed **Autism Spectrum Condition and PTSD**,
- the **signed medical report** from Dr Bruce Hayse confirming clinical psychiatric risk,
- and the fully engaged duties under:
 - **Equality Act 2010**, ss.20–21 (reasonable adjustments),
 - **Public Sector Equality Duty**, s.149,
 - and the overriding objective concerning vulnerable litigants.

A paper-only determination would be **unsafe, discriminatory**, and contrary to the Court's statutory duties.

2. Open Justice and public listing

As the claim is now sealed, it is subject to the **Open Justice principle** and CPR 5.4C.

I therefore ask the Court to ensure that the claim is listed for an **oral hearing**, and that no steps are taken on the papers unless I am able to participate effectively with reasonable adjustments.

3. Urgent listing request (N463)

My N463 urgent application — filed 25 November and resubmitted with a fully ACO-compliant bundle on 1 December — remains outstanding. I respectfully request that this now be placed before a judge for urgent consideration.

4. Confirmation requested

May I please have confirmation of:

1. The next procedural step for this claim
2. Whether the urgent N463 has now been referred to a judge
3. Assurance that no paper-only decision will be made

Given the medical evidence and the safeguarding concerns identified by my treating physician, timely progression is essential.

Thank you for your assistance.

Yours faithfully,

Nadia Zahmoul
